Task #5 (2.22 pts.) - Reflection

Progress: 100%

Details:

- Did you have any issues/problems this module? If so, what were they and how did you solve them?
- Did you learn anything new this module? If so, provide some brief details.
- If both answers were no, briefly explain your prior background.

Your Response:

I had some problems with my ssh key but I was able to resolve it using eval "$(ssh-agent -s)" ssh-add ~/.ssh/github_key. I did not learn anything new considering I have used github before, the only new stuff was downloading java via gitbash and using gitbash instead of powershell.
